

Odor-Bloc[®]

Equine Stall Odor Eliminator

“World’s Best Odor Eliminator[®]”

Odor-Bloc[®] Equine Stall Odor Eliminator is an all-natural, environmentally-safe additive that has been shown through extensive research to eliminate unpleasant odors such as ammonia and sulfide and phenol gases.

Odor-Bloc[®] Equine Stall Odor Eliminator combines the odor fighting power of **Odor-Bloc[®]** with all natural absorbents to eliminate offensive odors.

Natural Absorbents – Trap moisture and lock in urine ammonia with a unique clumping action for easy moisture removal.

Odor-Bloc[®] – Reduces formation of ammonia and other noxious gases to control odor at its source.

The ingredients in **Odor-Bloc[®] Equine Stall Odor Eliminator** are natural and completely safe for the environment. After use, this product can be spread on fields, gardens, or compost piles to provide slow-release nitrogen or can be handled however spent bedding is normally disposed. **Odor-Bloc[®] Equine Stall Odor Eliminator** contains no added aromas or fragrances. Although some

products simply try to cover up or mask odors with fragrances or scents; this does not solve the problem. In addition, market surveys have shown that many added fragrances are irritating to horses and their owners.

Odor-Bloc[®] Equine Stall Odor Eliminator is a granular product that is sprinkled on top of normal stall bedding. These granules quickly penetrate through the bedding to provide a protective odor-blanket throughout the stall. As well, they continue to be effective when wet.

Odor-Bloc[®] Equine Stall Odor Eliminator is more effective than hydrated lime because it eliminates odors instead of just masking them. Unlike lime, **Odor-Bloc[®]** will not cause drying and cracking of hooves and is not toxic or hazardous to the environment.

High concentrations of ammonia and other odor causing gases can increase the risk of serious health problems for horses and farm workers, including eye irritation, respiratory disease and confinement cough. Elimination of

odors with **Odor-Bloc® Equine Stall Odor Eliminator** reduces this risk and helps to ensure a quality life for you and your horses.

Odor-Bloc® Equine Stall Odor Eliminator is economical. A 20-pound container treats up to twenty 10' X 10' stalls, resulting in a cost of just pennies per day. Many users have suggested that with proper stall maintenance, the use of this product reduces clean-up and extends bedding life up to twice as long.

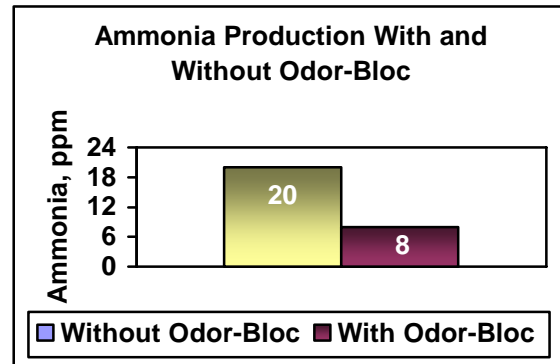

Odor-Bloc® Equine Stall Odor Eliminator is conveniently packaged in 20 pound pails that are easily displayed and require minimal shelf space. Pails are stackable and are placed on pallets with total of 120 pails per pallet. For larger horse farms, 40-pound bags are also available by special order.

Odor-Bloc® Equine Stall Odor Eliminator is non-toxic and safe to handle. It requires no special procedures for either application or disposal.

Odor-Bloc® Equine Stall Odor Eliminator is safe and effective for all livestock and pets and can be used wherever offensive odors accumulate. This includes bedding for cattle,

sheep, pigs, pets, exotic animals, and livestock shows.

Odor-Bloc® Equine Stall Odor Eliminator research

Ammonia reduced by 60% with Odor-Bloc®
